## K-LOOP PROCESS

**K-loop** is a project specially created by Kimood. By using recycled polyester from plastic bottles and cotton off-cuts from clothing production by the KARIBAN BRANDS family, the K-loop collection is closing the loop of the circular economy in the strict sense of the word. What's more, a cutting-edge traceability technology (Aware™ tracer) allows end users to track all the steps in the production of their bag, from start to finish.

### AWARE™ Technology

KARIBAN  
BRANDS

Sustainable materials (from  
KARIBAN BRANDS textile  
scraps and recycled plastic  
bottles).

**AWARE**  
THE TRUE STORY OF RECYCLED FABRICS

AWARE tracers (micro particles).

1

#### Step 1

The recycled fibre is mixed with  
invisible micro-particle tracers.

>> A digital passport for the recycled fibre is  
issued. Secure storage in the "blockchain"  
(information storage and transmission technology).

2

#### Step 2

The garment is woven from  
recycled/traced fibre.

3

#### Step 3

The finished product  
is scanned.

#### Step 4

Authentication: the scan  
detects the recycled fibre  
previously traced and stored  
in the "blockchain".

## RECYCLED COTTON K-LOOP PROJECT SHOPPER

**285 gsm** • 73% cotton/25% polyester/2% other fibers. Shopping bag in 73% recycled cotton and 25% recycled polyester. This bag is part of the "K-loop" project. With this project, Kimood is closing the circular economy loop in the strict sense of the word. The cotton used comes from waste generated in the production of cotton t-shirts for the Kariban brand, from the KARIBAN BRANDS family. The added polyester comes from recycled plastic bottles. During the recycling process, we add tracers to the thread, i.e. electronic chips containing a blockchain (storage and information transmission technology) which stores all the operations carried out on the thread. With the Aware™ tracer technology, Kimood thus allows the end consumer to monitor the entire production process with the guarantee of a product recycled according to best practice, with no possible modifications during the process. With "K-loop", Kimood is closing the circular economy loop.

## RECYCLED MATERIALS

**73%** recycled cotton  
**25%** recycled polyester  
**2%** others fibers

## REDUCTION OF ENVIRONMENTAL IMPACT

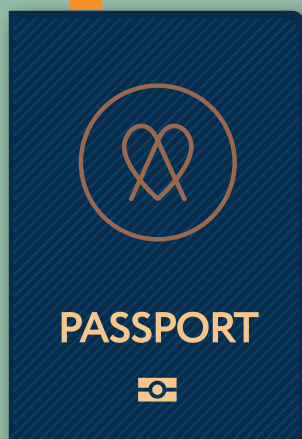

- 1048** litres of water saved
- 3.1** megajoule of energy saved
- 0.8 kg** of CO<sub>2</sub> emissions avoided
- 0.000061** hectares of land save
- 3.6** bottles of 0.5 L saved
- 0.18125** kg of waste avoided

## HANDLOOM COLLECTION :

As part of its sustainable and ethically responsible approach, the Kimood brand is constantly striving to improve and reduce the impact of its production on the environment and society.

Thanks to a close collaboration between the Kimood brand and the HandTouch company, a member of ECOTA (an organisation that promotes fair trade in Bangladesh), this collection helps support the economy of families living in remote Bangladeshi villages, on the work of women in particular, preventing the villages from becoming deserted. Every piece in the recycled Handloom collection is unique and hand-made with all the care and meticulousness that this involves. The bags are hand stitched using traditional looms from Bangladesh known as "tant" looms. The traditional weaving gives the canvas a distinctive and unique handcrafted look.

### ANTI-THEFT POLYESTER BACKPACK

100 % polyester. Of which 50% recycled polyester. Combo version workwear backpack/travel bag KI0889. The ideal travel companion, this bag has a combination TSA anti-theft zip fastening along the rear seam for added security. It also protects your belongings thanks to a side pocket with an anti-theft cable to attach your bag to a table or chair leg and an inner pocket with RFID protection that protects against the fraudulent scanning of your data on a chip card or your credit card. This comfortable bag has padded reinforcements on the back, padded adjustable straps and an adjustable chest strap for easy carrying, two tie straps under the bag to carry jumpers and jackets, two side pockets, one charging pocket on the side with a USB port pocket for connecting the device to be charged and a micro USB port (cable included) on the side of the bag for a powerbank connection. This clever bag boasts two zipped pockets on the straps and a detachable padded shoulder strap that turns it from a backpack into a travel bag. The bag's main compartment is separated from the back compartment by a zip fastening mesh to hold clothes. The back compartment can be used to store a laptop up to 15" and padded storage for a tablet up to 11", a mesh pocket as well as two removable zipped pouches for cables and accessories.
