Flags

Flags

Custom Flags

There's no good effect without good design. To do its job well your flag should be designed by a professional graphic designer. You can either email us your own design or take advantage of our graphic studio. Our professional design staff has vast experience in satisfying the most demanding customers. Kindly call + 48 32 23 10 90 to discuss how your designs should be prepared for printing and how you can send them to us.

Materials

Our flags are made to flutter in the strongest of winds. It's then they have the strongest impact. However, not only do they have to battle with the wind, but also with sunshine, acid rain, air pollution, and surprises left by birds. Our flags are made of high quality polyester knitted fabric (100% synthetic, 90 or 200 g/m², B1-Certified) specially prepared for overprinting. Heated-treated, they are highly resistant to the most extreme weather conditions and their low saturation level protects them from permanent stains. Upon customer request, we will gladly send samples.

Size

The bigger the flag, the better? Not necessarily. Large flags weigh more and hinder fluttering ability. More important than the size of a flag is whether its design is recognizable, or whether it's properly fitted to a flagpole, as well as the flagpole's location. Our standard flag size is 130 x 350 cm. At this size it's possible to print most graphic designs. However, upon request we can also make custom flags in various sizes and shapes.

Production

We settle the entire production process in one place in order to monitor the quality and quickly respond to any customer wish. All seams are made by a solid double stitch. We specially strengthen flag corners so the flag does not shred, and on the montage side we sew a durable polyester band. Each piece of flag is given plastic carabiners for raising the flag on a flagpole. Every finished flag is then carefully examined to check its quality.

Arena & Stadium Flags

With our giant crowd flags you can draw attention to your team or company with pizzazz. They're perfect for sporting events, opening ceremonies, media coverage, concerts, and rallies. We can print any colour, logo, or shape that you wish.

Team Flags

Using flags is a wonderful way to represent and show pride in your team, whether it be at the high school, college, or professional level.

Flags

Guarantee

All our flags, regardless of their size, colour or place of exhibition are under guarantee. We guarantee the durability of seams, carabiners, the permanency of cloth parameters, and the durability of our overprint. We guarantee the highest quality of our products, but we cannot compete with nature. While being used, flags are constantly subject to deterioration, not only because of the influence of weather conditions, but also because of raising and lowering, as well as cleaning or storing. As a result of everyday usage, the aesthetics of a flag deteriorates gradually and irreversibly.

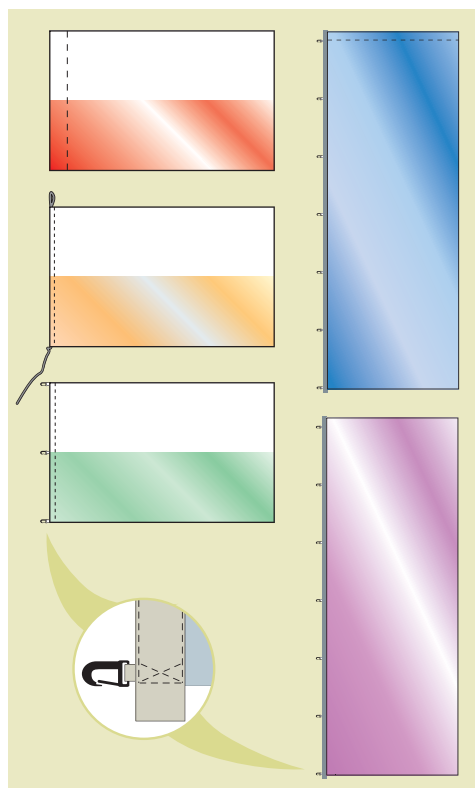

Flags

Car Flags

Size: 31x40 cm; printed on polyester material; technology: screen printing or digital printing, allowing for a full range of colours as well as photographs; printed in full on the left side of the perforation. The flagpole's 52 cm tall and made of flexible material, resistant to driving at speeds of up to 120 km/h, before the self protection clip slips from the car door window. The clip fits every type of car. Standard colour: white.

Garlands

Our garlands (20x30 cm) are printed on water-resistant and fire-retardant polyester knitted fabric 240 g/m², using dye-sublimation transfer on one full side. They are then trimmed at the edges and sewn into a 2x1 cm polyester tape.

We also offer coloured triangle garlands (20x30 cm) made of 140 g/m² polyester knitted fabric. The triangles are 20x30 cm and are connected to a 2x1 cm yellow tape. There are 4 pennants per metre. A string of garlands is 50 metres in length.

National Flags

Our national flags are digitally printed on high quality polyester fabric 110 g/m². The 110x70 cm and 145x95 cm flags have a sleeve on the left side that is 3 cm in diameter, perfect for a wooden pole 2,2 cm in diameter. Our 200x125 cm and 350x130 cm flags have carabiners that make it easy to fasten to any pole.

Bike Pennant

This Bike Pennant kit consists of bike-mount, fibreglass pole (175 cm), onion-shaped finial and custom-printed (dye-sublimation) pennant (polyester knitted fabric, 240 g/m²). Rectangle and triangle shapes are available: 30x23 cm.

Economy Flag Holder Kit

As many as four 30x40 cm flags can be mounted on this innovative economy flag holder. It's the perfect economy kit for national holidays, mass sporting events, and advertising campaigns.

Golf Pin Flags

We offer three types of Golf Pin Flags:

- Single reverse printed on 115 g/m² polyester fabric,
- Double side printed with black filter in the middle, 205 g/m² polyester,
- Double side printed 205 g/m², stitched with nonabsorbent polyethylene foam 1 cm thick to keep the flag taut and visible on windy days.

Flag size is 31x40 cm with a plastic tube to make the flag easy to mount on a pole 15 mm in diameter.

Bunting Fans

These pleated flags are perfect for creating a unique festive atmosphere during both indoor and outdoor events, whether they be patriotic or religious, or celebratory of a certain message or brand name.

National, state & municipal flags

National Flags

We offer a complete set of national flags that can be raised onto two meter high flagpoles.

National flags

Municipal flags

State flags

Mini Flags

BatFanette Beach with Suction Cup

The suction cup allows setup on smooth surfaces such as windshields, windows, and car rooftops. The pole can easily be adjusted in any direction. The flag itself is printed using dye-sublimation transfer on 115g/m² knitted polyester fabric and is attached to a fibreglass pole and black polyester sleeve.

Pennants

We manufacture miniature pennants in standard rectangle shapes 13x22 cm, as well as in shapes suggested by our customers. We use high-quality polyester satin for the flags and offer a wide variety of bases.

Table Flags

Our table flags are printed on polyester satin 180 g/m². Standard flag size is: 15x24 cm. Minimum order: 10 units.

BatFanettes

These miniature beach & feather flags will look stunning on every desk or table. Printed on polyester satin they come in four sizes: 14x28, 9x29, 11x23, 9x27 cm. Minimum order: 10 units.

Spritello Beach

Spritello Beach is our largest desk flag in the shape of an insect wing. It's printed on 115 g/m² polyester knitted fabric using dye-sublimation transfer. The kit comes with black etui, fibreglass pole, and round aluminium base. Size: 23,2x43,5 cm Minimum order: 10 units.

Telescopic Wheel Base & Pole

Wherever a flag must be set up quickly, or only temporarily, or on a surface that does not allow permanent placement, there our telescopic wheel pole is the perfect solution, easy to use, with perfect footing. All that is needed is half a metre of flat and hard surface to set up the base of the pole, and securing it with the wheel of a vehicle.

- four sections each 150 cm in length
- Maximum pole height from the level of the substrate: 550 cm
- section diameters are as follows : 49.5, 44, 40 and 36 mm
- pole weight 5 kg weight, steel alloys covered with plastic covering 3 kg, weight of the metal base: 3 kg

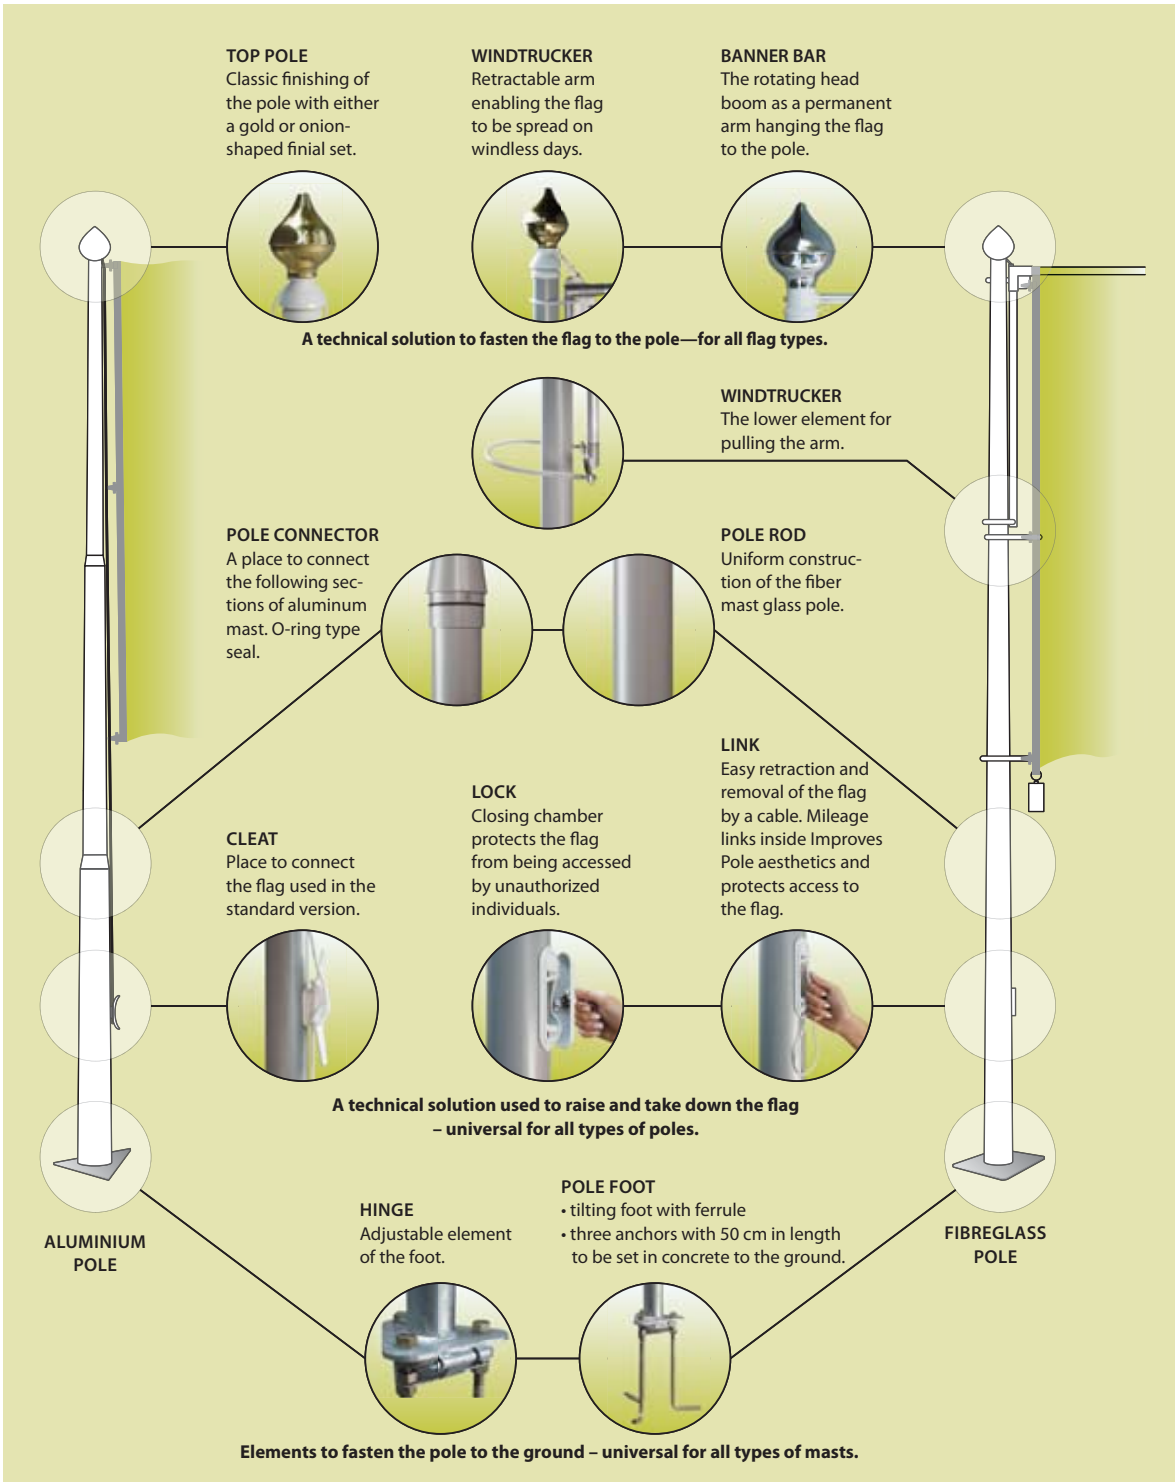

- telescopic chassis with fluid regulation of height
- the top of the pole is finished with either a mushroom or onion shape
- a gaff allows the flag to be raised outside

- flag is permanently secured to its counter weight
- a plastic ring connecting the flag to the pole

- a rugged foot base made of either steel or plastic

Flagpoles

Flagpole Types

We always have aluminium or fibreglass flagpoles in stock for indoor and outdoor use. A standard flagpole – a flag hoisted manually with a rope tied to a cleat in the lower part of the flagpole. The top is finished with a silvery decorative heading. The heading rotates freely on its own axis. Additionally, we provide a hinge and a set of anchors to be concreted in the ground. An Internal flagpole has a special mechanism for hoisting and lowering a flag with a crank. This flagpole is finished with a silvery rotating heading which helps a flag to catch the wind. A complete set consists of a hinge and metal anchors to concrete a flagpole in the ground.

Indoor flagpoles

Stable, handsome flagpoles for indoor exhibition in offices, cabinets, in halls (of institutions) or conference rooms. Stable, metal base and aluminum tubes are evenly powder coated in gold.

- Aluminum flagpole of a 25 mm in diameter and 200 cm long tube
- top with a brass ring to fasten the flag

Montage

We provide a professional installation service at the place directed by the customer. To receive detailed information about the installation specifications (ground, architectonic regulations, location) contact our office.

Guarantee

Modern and very durable materials that are used in the production of our flagpoles allow us to give our customers a 5 year guarantee on each aluminium or fibreglass flagpole.

Individual orders

On orders larger than 25 flagpoles we can supply flagpoles dyed in various colours according to the RAL scale. We supply one piece flagpoles on order (height up to 24 metres).

Sandwich Pop-up Banners

Our pop-up banners can be set up and taken down in seconds, thanks to their unique fibreglass frames. Custom-printed on 200 g/m² polyester-knitted fabric that is both water-proof and fire-retardant (B1-certified), the banners make for stunning, eye-catching advertisements, both indoors and outdoors. Each banner comes with its own carry bag and spikes. We offer the following shapes and sizes:

Oval – 270x135, 250x100, 200x100 i 120x70 cm

Square – 140x140 cm

Tower – 100x150, 100x200, 150x300 cm

Rectangle – 300x100, 250x100, 200x100, 150x75, 200x140 cm

Lounge & Lobby Furniture

We offer lounge furniture with custom graphics that allows free arrangement of ad space according to customer wishes. The personalized lobby furniture is available in two shapes: square or oval. The entire surface of the furniture is printable, and in areas exposed to wear, extra varnish is added to ensure the printing lasts and the colours remain vibrant. Our machinery and experienced staff allow you to print in small or large runs, even with mixed graphics. We can print any logo, sign or image. A solid frame, polyurethane foam, and latex printing of the highest quality on eco-leather make for a unique appearance and high ease of use. For tables we offer squares or rectangles made of rigid polyurethane foam with the top layer of the print covered with a hard plate. Our custom furniture is small in size, and a set (2 armchairs + sofa) can be shipped on a single pallet.

Display Systems

Director's Chair

Our foldable director's chair is lightweight, portable and easy to set up. Designed specifically with portability in mind as it features hinged legs and arms to make it more compact during travel, the chair is perfect for use by trade show exhibitors. Made of Ø 22 mm steel with black finish, it is not only sturdy and highly durable, but handsome and eye-catching as well.

- Custom imprint on both sides of padded back
- Codura padded seat with full-colour stitched-in custom imprint
- Comes with printed back rest
- Secured to chair with Velcro

Available with padded arm rests and side bag.

Display Systems

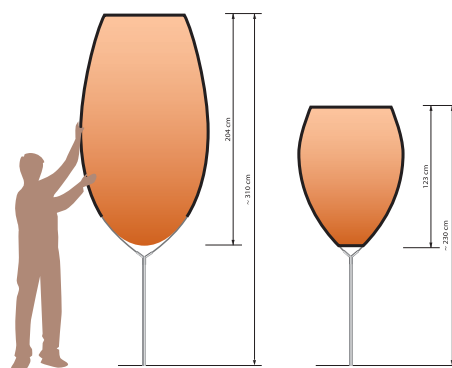

Pull up stands

In various sizes and various shapes. Printed on PVC or polyester materials.

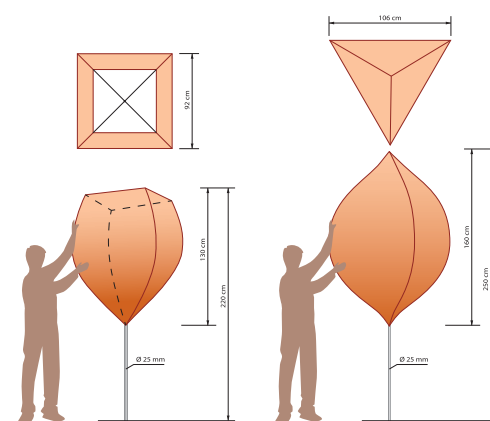

Chalice Banner

Our Chalice Banners are unique alternatives to beach and feather flags, as well as to lantern banners and spinning darts. Digitally printed on 115 g/m² polyester knitted fabric, and placed on a flexible fiberglass forked pole, they can be mounted on a variety of bases. Each kit comes with its own carry bag.

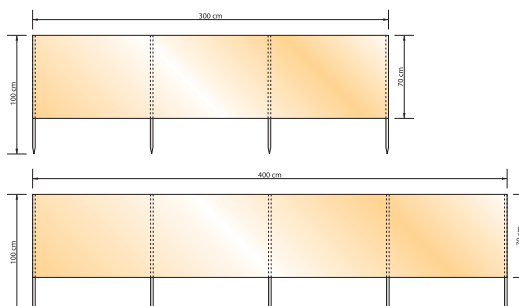

Lantern Banners

Our custom-printed Lantern Banners are stunning eye-catchers that can be used both indoors and outdoors. They are unique alternatives to traditional beach and feather flags, as they can spin gently in the wind. They can be paired with a variety of spikes and bases.

Wind screens

Printed on 2 different types of polyester. Standard sizes 70x300 cm and 70x00 cm. Polyester cloth along with 2 beech bars, diameter of 22 mm are packed in a nylon or a polyester bag.

Cube Bean Bags

Our custom cube bean bags are printed on high-quality polyester fabric that is both water-proof and fire-retardant (B-1 certified). We print using dye-sublimation transfer, making for sharp images and vibrant colours.

Custom-Printed Bean Bags

Our custom bean bags are printed on high-quality polyester fabric that is both water-proof and fire-retardant (B-1 certified). We print using dye-sublimation transfer, making for sharp images and vibrant colours. Each bean bag has its own zipper and liner, which is filled with polystyrene beads. Personalized printed covers can be changed to meet customer requirements. A wide variety of images can be chosen from our template base, many of which are digital reprints of artwork provided by our stable of professional painters, drafters, and designers.

Court Barriers

Six-Piece Building Block Puzzle

Although the cubes are perfect for branding, they can also serve as building blocks for children.

Custom Printed Pillows

Our custom-printed pillows are light-weight advertisements that are not only eye-catching, but comfortable. Made of B1-certified polyester knitted fabric, and filled with polyester fluff, they are resistant to all weather conditions. Ideal for both children and adults, they are perfect for bars, restaurants, showrooms and outdoor events. We guarantee high quality materials and the durability of our print. We offer pillows in the following sizes: Ø 40 cm, 60 cm, 40x40 cm, 50x50 cm, 80x60 cm, 100x60 cm and 60x120 cm in these shapes: square, rectangle or circle.

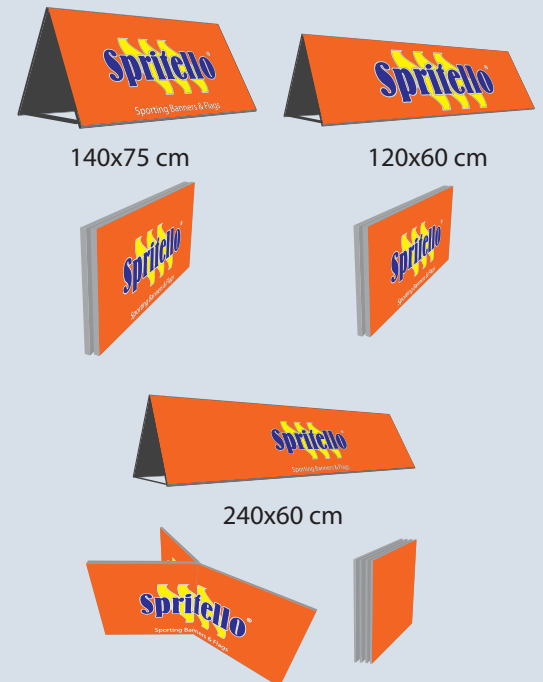

Display Systems

Sideline Markers

Our padded custom-printed sideline markers (20x20") offer a unique alternative to traditional makers, as not only can they represent a team, but team sponsors as well. Our markers are made of rugged cordura and polyester knitted fabrics, come with triangle eyelets and spikes to keep them secure on windy days, as well as handsome carry bag. The markers are offered in sets of 11 and 22.

Sideline Safe Sports Barriers

Express Tents

Classic Canopy

Classic Canopy offers an affordable solution for those looking for a custom printed scissor-framed tent, but are on a tight budget. Each tent after folding is only 160 cm long, therefore it can be easily transported in most cars. Every tent package includes a set of lines and pins that secure the tent in bad weather conditions. Assembly is very easy thanks to the construction without any loose parts. 4-level height regulation allows the tent to be adjusted to the user's needs. The roof and walls are made of water resistant and double impregnated polyester fabric. Features:

- 3-year warranty for the frame,
- Light aluminium structure (leg cross section 30x30 mm) which does not have any loose elements,
- Aluminum connectors (instead of plastic) strengthening the structure,
- The canopy and walls are made of wear resistant, water resistant and double impregnated polyester fabric with the density of 220 g/m².

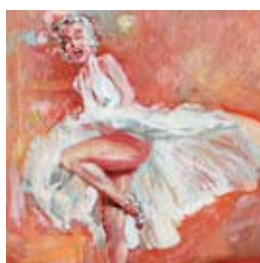

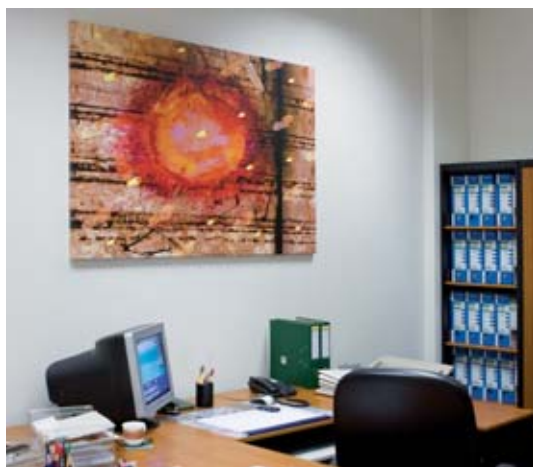

Premium Canopy

Premium Canopy comes with a sturdy Ø 40x40 mm reinforced frame and durable 300 g/m² reinforced polyester roof. 300 g/m² add-on walls are also available. As it is a tent built to last, we offer a 5-year guarantee on the frame. Features:

- 5-year extended warranty for the frame,
- The only structure on the market compliant with the requirements of the norm PN-EN 13782:2005 (for 3x3 m, 3x4.5 m and 3x6 m sizes),
- Reinforced, aluminium structure (cross section 40x40 mm) which does not have any loose elements,
- All sword-element connectors are made of pressure die cast aluminium reinforcing the frame,
- The canopy and walls are made of reinforced, wear and tear resistant, water resistant and double impregnated polyester fabric,
- 5 colours of construction: white, green, blue, black and grey.

Canvas prints

Canvas prints of artwork by renowned painters and modern graphic artists beautifully fill the empty spaces on office walls and on the walls of hotel corridors and guest rooms. Send us a digital photo and we can print it for you on canvas. It will make an excellent present. We print at high resolution on either PVC-coated cotton or on polyester material that weighs 200 g/m².

The artwork is then pulled over a stretcher bar frame. In larger sizes, eg 100x150 cm, the frame is reinforced with cross bars. We can mount on stretcher strips measuring 10cm in length, in even sizes of 80x90, 90x100, 100x110 cm, etc. So it is possible to order a frame of almost any size. Once mounted on the frame, the artwork is carefully packed so that it safely reaches an awaiting client.
